Patron's Message

It's my pleasure to welcome you all to yet another scientific endeavor from the SCALE platform – SCALEHEART 2016.

SCALE was launched a year back with the sole aim of imparting education, knowledge, and awareness to all healthcare professionals on the appropriate care of heart attack patients. An alarmingly large number of people lose their lives, or continue to suffer, after having a heart attack. Much of such loss is due to lack of awareness and appropriate action; not just the lack of resources alone.

Healthcare is the main concern of our generation. As members of the SCALE community, we are dedicated to serving people with compassion and excellence. Through this forum, we are reinforcing our pledge to contribute to the society as responsible healthcare providers. I invite all healthcare professionals to join hands to narrow the gap between succumbing to heart attacks and enjoying quality living.

Wish you all a very enriching day, full of learning from the masters in heart care!

H.E Sami Dhaen Al Qamzi

Message from the Chairman – SCALE

‘SCALE’ was launched one year back; with the sole mission to educate health care professionals and the society at large to prevent deaths and damages from heart attacks.

Acute heart attack – known in medical terminology as Acute ST Elevation Myocardial Infarction (STEMI) occurs in all adult age groups and a major killer. However, majority of the lives can be saved by timely and appropriate actions. Currently there is a big gap in ‘What can be done’ and ‘what is actually done’. This gap has to be narrowed down. Education has power. Educating for early recognition and early treatment of this major killer can make a major difference.

As a part of this constant endeavor, I welcome you all to the II annual meeting- the SCALEHEART 2016 where experts in the field will share the information and knowledge.

Dr. Brajesh Mittal
Chairman – Scale

Message from the President Emirates Cardiac Society

Coronary artery disease is the number one killer. Acute myocardial infarctions result in major mortality and morbidity to an individual. In addition, it is a menace to the families, societies and the communities. Due to high prevalence of diabetes mellitus, obesity and smoking in this region – UAE is severely burdened with this problem.

Emirates Cardiac Society is keenly concerned to contain and bring down the incidence of ACMI and related impact.

On behalf of ECS, I welcome you all in this conference dedicated to exchange of education in this direction.

Dr. Abdullah Shehab
President Emirates Cardiac Society
